

ANISH KUMAR PATEL

Cybersecurity & Digital Forensics Student | IT & Cybersecurity Enthusiast

anishkpatel@proton.me | Kathmandu, Nepal | [LinkedIn](#) | [GitHub](#) | [TryHackMe \(Active Learner\)](#)

PROFESSIONAL SUMMARY

Driven and versatile BSc student in Cybersecurity and Digital Forensics at The British College, Kathmandu (affiliated with the University of the West of England, UK). Combines academic knowledge with real hands-on project experience — built Python applications including a Student Profile Management System, cybersecurity tools including a basic network sniffer and secure coding review system, and a responsive website using HTML, CSS, and JavaScript. Actively learning offensive and defensive security on TryHackMe. Holds five Cisco Networking Academy certifications and completed a professional cybersecurity internship at MoneyMitraNetwork. Comfortable across Windows and Linux (including Kali Linux), networking fundamentals, and basic software development. Seeking IT internship opportunities across IT support, cybersecurity, networking, QA, MIS, and digital roles in IT companies across Nepal — ready to contribute wherever my skills are most valuable.

EDUCATION

Bachelor's Degree — Cybersecurity & Digital Forensics (2025-2029)

The British College, Kathmandu (Affiliated: University of the West of England, UK) | 2025 – 2029

- Core subjects: Network Security, Digital Forensics, Python Programming, Ethical Hacking, Cryptography, Linux Systems, Cyber Law
- Academic projects: Student Profile Management System, Network Sniffer, Secure Coding Review Tool

Higher Secondary (+2) — Science Stream (Passed)

Triton SS & College, Kathmandu | July 2023 – June 2025

TECHNICAL SKILLS

Programming & Development

- Python — scripting, automation, file handling, CLI apps
- HTML, CSS, JavaScript — responsive web development
- Bash scripting — basic Linux shell automation
- Git & GitHub — version control and project sharing

Networking

- TCP/IP, DNS, DHCP, OSI model fundamentals
- LAN/WAN, subnetting, IP addressing
- Router & switch configuration (Cisco certified)
- Cisco Packet Tracer — network simulation & testing
- Basic network troubleshooting and diagnostics

Operating Systems

- Windows 10/11 — administration and troubleshooting

Cybersecurity

- Vulnerability identification and threat analysis
- Secure coding review and OWASP basics
- Network sniffing and packet analysis fundamentals
- Penetration testing concepts (TryHackMe)
- Critical Infrastructure Protection (CIP)
- Incident documentation and security reporting
- Kali Linux tools — basic reconnaissance and scanning

IT Support & Tools

- Hardware troubleshooting and basic system maintenance
- Software installation, configuration, and updates
- MS Office Suite: Word, Excel, PowerPoint
- Google Workspace: Sheets, Docs, Gmail
- AI tools: Claude, ChatGPT, Generative AI
- Data entry, documentation, and MIS reporting
- PDF management, scanning, printing systems

- Linux (Ubuntu/Debian) — terminal, commands, file system
- Kali Linux — security tools and ethical hacking basics
- Bash — basic shell scripting and command-line operations

PROJECTS & PRACTICAL WORK

Student Profile Management System | *Python*

- Built a command-line application in Python to create, store, update, and retrieve student profile records
- Implemented CRUD operations with structured data management and file handling
- Demonstrates practical Python skills in data storage, user input handling, and application logic

Basic Network Sniffer | *Python / Kali Linux*

- Developed a packet-capturing tool in Python to monitor and analyze real-time network traffic
- Applied knowledge of TCP/IP protocols, packet structure, and network data flow
- Demonstrated understanding of how network monitoring tools work at a foundational level

Secure Coding Review Tool | *Python / Cybersecurity*

- Built a Python-based tool to scan source code for common security vulnerabilities and weak patterns
- Applied OWASP-inspired concepts including injection risks, hardcoded credentials, and insecure functions
- Generates structured vulnerability reports with severity classification

TechNova Website | *HTML, CSS, JavaScript*

- Designed and developed a responsive technova website from scratch
- Applied modern CSS styling, layout techniques, and basic JavaScript interactivity
- Demonstrates ability to build functional web interfaces and understand front-end development basics

TryHackMe — Active Cybersecurity Learning | *Ongoing*

- Actively completing cybersecurity learning paths covering penetration testing, web security, and network defense
- Practicing hands-on CTF challenges covering Linux, OSINT, web vulnerabilities, and privilege escalation
- Profile: TryHackMe — consistent skill-building beyond the classroom

INTERNSHIP EXPERIENCE

Cybersecurity Intern

MoneyMitraNetwork | 2026 | 1 Month

- Completed real cybersecurity assignments covering vulnerability analysis, threat identification, and security documentation
- Built and tested Python-based security tools during the internship period
- Maintained detailed technical reports, task logs, and structured deliverables throughout
- Demonstrated professional reliability, independent work ethic, and on-time delivery

CERTIFICATIONS & TRAINING

- Networking Devices and Initial Configuration — Cisco Networking Academy | 2025/26
- Networking Basics — Cisco Networking Academy | 2025
- Getting Started with Cisco Packet Tracer — Cisco Networking Academy | 2025

- Introduction to Cybersecurity — Cisco Networking Academy | 2025
- Introduction to Critical Infrastructure Protection (CIP) | 2025
- Generative AI Mastermind | 2025

WORKSHOPS & ACTIVE LEARNING

- Cyber Attack Simulation Workshop — Vrit Jobs (Tech & Finance Niche Recruitment Company) | 2026
- TryHackMe — Active learner completing cybersecurity rooms, CTFs, and learning paths (Ongoing)

LEADERSHIP & VOLUNTEER EXPERIENCE

Organizing Committee Member — Hult Prize 2025/26

The British College, Kathmandu | 2025–2026

- Managed digital coordination, databases, outreach campaigns, and team communications for a global competition
- Demonstrated project management, leadership, and professional responsibility in an academic environment

Event Volunteer — Rota Run 2026 (Mini Marathon)

Kathmandu | 2026

- Handled participant coordination and data management in a large-scale public event
- Demonstrated reliability, teamwork, and professionalism under pressure
